office trickery .- Portage Sentinel,

FORMATION OF COAL .-- The following, we extract from a geological lecture delivered by Dr. S. Foster, of New York, contains some very interesting matter relative this to be the case. to the origin of the formation of coal. The Doctor supports the admitted theory of vegetation deposit, but introduces a few novel objection we ever raised to it was its inter suggestions as to the peculiar class of tree which comprise the coal bed:

"He said that it was a remarkable fact, that in the coal measure, which was found tical effect when the people come to act to be composed of tropical vegetation, all forming a state government. Other demo over the globe, for 10,000 feet, a vegetation cracts however, take a somewhat differen never known before or since, all the trees view of it, -take exceptions to other provi were indigenous, that its growing from within outward as the palm, of which we find a right to do, and as we before remarked coal specimens with trunks twelve feet in are none the less democrats for that,diameter. At our age, on the other hand this we can agree to disagree, and act has nine-tenths of the vegetation is of oxygenous moniously and in concert in sustaining the growth, that is, growing by accretion from glorious cause of Democracy not only for instance, it will not be seriously injured, while the same operation with the oak would destroy its life, the vitality of the first case being within, and in the latter on the outside of the trunk

"What is singular in the coal formation West, and among other things which is, that it is not one solid mass of coal but describes is the laundry of the Burn there are several layers of coal alternating House, Cincinnati. He says it differs fro with layers of rock Two theories are as other similar institutions in its wringing signed for this peculiarity. One supposition faculty, and this is done on the scientific is, that after a dense growth of vege ation, principle, centrifugal propulsion. Should the earth was submerged and a deposit of a hundred persons arrive at the hotel withsand took place, and this process centinued out a change of linen, they might divest for thousands of years—hence the alteration for a bath, and the soiled garments being of strata. But the most probable theory gathered in a heap, are flung into a patent is, that the successive growth of vegetation steam washing machine, where in 5 minutes aropical rivers, gradually accumulating into into a box which rotates horizontally with wast rafts, which finally obstructed the flow such force, as in three minutes to press in size and quality, from \$1,50@2,50 beof the rivers, and in consequence the stream them against the periphery, until every drop seams are found the first signs of animal tige of dampness; five minutes suffices to life upon land. The bird tracks are the 'mangle,' fold, and deposit the same at the

upper story of a warehouse occupied by E.

Destroyed by Fire

Detween the years 1839 and 1851, large and valuable tracks of timber have been cut down and sacrificed to the flames, for the want of proper machinery to make it valuable.

Having purchased the right to minufacture and use Wood's improved shingle machine in the county of Harrison, we now offer for sale township or individual rights on favorable terms. This justiv celebrated machine will make and joint from 80 to 100 shingles per minute, and do its work well. Testimonnals can be produced from the highest mechanic.

The principles upon which it is claimed that the Chains produce their maryolous cures are, first magnetizem; and second—that the electro magnetic magnetizem; and cure of the aboves that has attended their assignance and the success that has attended their assignance and cure of the aboves that has attended their assignance and the success that has attended their assignances.

Frowons to their narched here used in every bospital in Europe, and are second—that the claims, provides that has attended their assignances and their assignances and their assignances and their assignances and their assignances.

The private scale in every bospital i

MODE OF USE). The chain should be moistened

not to care all diseases; but for Nervous Diseases it is claimed that NO Medical Agent in the world has produced so many cases in the last year as the Elecic chain. INSTANT RELIEF from the most acute pain, is

FOR ALL THE PURPOSES OF A

FAMILY. PHYSIC. THERE has long existed a public demand for an effective purgative pill which could be relied on as sure and perfectly safe in its operation. This has been prepared to meet that demand, and an executive trial of its virtues has conclusively shown with sure and perfectly safe in its operation. This has been prepared to meet that demand, and an extensive trial of its virtues has conclusively shown with what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy te make the best of all pills—one which should have none of the objections, but all the advantages, of every other. This has been attempted here, and with what success we would respectfully subsuit to the public decision. It has been unfortunate for the patient hitherto that almost every purgative medicine is acrimonious and irritating to the bowels. This is not. Many of them produces so make griping pain and revulsion in the system as to mose than counterbalance the good to be derived from them. These pills produce no irritation or pain, unless it arise from a praviously existing obstruction or derangement in the bowels. Being pursely vegetable, no harm can arise from their use in any quantity; but it is better that any medicine should be taken judiciously. Minute directions for their use in the several diseases to which they are applicable are given on the bex. Among the complaints which have been speedily cured by them, we may mention liver Complaint, in its various forms of Jaundice, Indigestion, Languer and Loss of Appetite, Listlessness, Irritability, Billious Headache, Billious Fever, Fever and Agus, Pain in the Sids and Loins; for, in truth, all these are but the consequence of diseased action in the liver. As an aperient, they afford prompt and sure relief in Occitiveness, Piles, Colic, Dysentery, Humors, Seeduls and Scurry, Colds with soreness of the bedy, Ulcars and impurity of the blood; in short, any and every case where a purgative is required.

They have also produced some singularly macressful cures in Kheumatism, Gout, Dropsy, Gravel, Frysipelia, Pulpitation of the Haar, Pains in the Black, Stomach, and Side. They should be freely taken in the strength of the blood, and, by their stimulant action on the circulatory system, reasonate and consistend

necessary desing should never be carried too for, as every purgative medicine reduces the strength, when taken to excess. The thousand cases in which a physic is required cannot be summerated here, but they suggest themselves to the reason of every body; and it is confidently believed this pill will answer a botter purpose than any thing which has hitherto been available to mankind. When their virtues are once known, the public will no longer doubt what remedy to employ when in need of a entirartic medicine. Being sugar-wrapped they see pleasant to take, and being purely vegetable, no harm can arise from their use in any quantity.

For minute directions see wrapper on the Bos. PREPARED BY JAMES C. AYER. Practical and Applytical Chemist LOWRLL MASS. Price 25 Cents per Box. Five Boxes for SL

CONSUMPTION.

Thus remedy has won for itself such notes from its cures of every variety of pulmonary discending the control of the country shows has been employed. So wish at the field of the aftimess, and so numerous the country shows in persons publicly known, who have been restor from alarming and even tispasses discased of lange by its use. When once tried its manadori over every other medicine of its kind is too against to escape observation, and where its virtues a known, the multic no longer business what as the to employ for the distressing and dangerous.
